Ladew Topiary Gardens and Ladew House  
Jarrettsville Pike  
Taylor, Maryland

The Ladew Topiary Gardens located on Old Jarrettsville Pike in Pleasant Valley is a remarkable assemblage of plant materials, landscape design attitudes and topiary designs. Designed more than forty years ago by Harvey Ladew, the gardens comprise both large-scale formal areas with grand vistas and more natural, intimate areas, punctuated throughout by a variety of garden furniture, ponds, and small buildings (including a small Greek temple that once served as the ticket booth of the old London Tivoli Theatre).

The house, constructed in three stages beginning in the late 18th century, includes an oval library which is listed in The 100 Most Beautiful Rooms in America.

The Ladew Gardens and the Ladew House are listed on the National Register of Historic Places and the gardens were given the Distinguished Service Medal of the Garden Club of America for being the most outstanding topiary garden in America.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Ladew Topiary Garden is a 14.55 acre parcel of Mr. Harvey Ladew's estate on the Old Jarrettsville Pike in Pleasant Valley, Harford County, Maryland. Although the garden is only approximately 40 years old, it is a remarkable assemblage of plant materials, landscape design attitudes and topiary designs. The garden has an overall linear plan which follows the Old Jarrettsville Pike in order that most of the estate could be left "open" and free for hunting purposes. The garden is open to the public from April through October on weekends, with special arrangements available for weekday tours. The garden is maintained by the Ladew Topiary Garden Foundation.

Garden and topiary design was a hobby of Mr. Ladew's during most of his life; and although he is not a landscape architect, he did all of the basic design and preliminary installation work himself. Mr. Ladew designed both large scaled formal areas and more natural, intimate ones into his garden. Other than the topiary work, which is found in the more formal areas, the three most important design elements considered in planning the garden were vista, color and texture. The major garden axis provides an uninterrupted view of over 1100 feet across terraced topiary, the large central circular bowl, and through hemlock allees. Minor axes provide shorter vistas across iris beds, pools, streams and lawns.

The smaller, natural areas of the garden are designed around a variety of individual color and textural schemes. The berry garden is totally composed of berry producing plant material. The azalea garden is an unusual combination of azalea varieties planted under a grove of apple trees. A series of white, red and yellow gardens contain flowers and shrubs of appropriate color. The most recent addition to the garden is an iris garden composed of hundreds of iris varieties, topiary, pools and streams.

Most of the topiary is maintained over wire frames. Mr. Ladew's first exposure to topiary was to that of Lady Sophie Scott, in England, and for many years he had his frames made by Lady Scott's supplier, although he eventually began having his designs manufactured in this country.

The entire garden is punctuated with a variety of garden furniture, ponds and small buildings. Several French lead figures decorate the hemlock allees. The azalea garden surrounds a circular pond and fountain and the topiary Chinese junk sits in a naturalistic pool. The large central bowl has an oval pool at its center. Two small buildings serve as both focal points and shelters. A small Greek temple sits at the end of the major garden axis and a tea house, that was once the ticket office of the old London Tivoli Theatre, is placed for seclusion and retreat.

The topiary designs are shaped from a mixture of both yew and hemlock. The designs include a foxhunt, swans, a Chinese junk, a giraffe, a Buddha, hedge

## STATEMENT OF SIGNIFICANCE

The Ladew Topiary Garden is a well-maintained example of combined formal and informal garden design. The formalism of the French and Italian garden attitudes is exhibited in the major axis, long vista, topiary shrubs, and use of both active and quiet waters. The informal naturalistic attitudes of English garden design are illustrated by the extensive use of spring bulbs and color coordinated garden areas.

The art of topiary dates from Tudor and Elizabethan England and was much used in 18th century Germany. It generally has had a very limited use in contemporary gardens as it is time consuming and expensive to maintain. This makes the extensive collection of topiary found in the Ladew Garden an invaluable resource both to the study of the art and the exposure of it to the public. Large-scale gardens themselves are valuable from a similar aesthetic and educational standpoint.

In 1971, the Ladew Gardens received the Distinguished Service Medal of the Garden Club of America for being the most outstanding topiary garden in America.

The Ladew House is important because of its relationship to the Topiary Gardens. At Mr. Ladew's death, the house will become the property of the Ladew Topiary Garden Foundation, who will open it to the public, exhibiting his collections of porcelain, furniture, paintings, and hunting memorabilia.

## DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Ladew Topiary Garden is a 14.55 acre parcel of Mr. Harvey Ladew's estate on the Old Jarrettsville Pike in Pleasant Valley, Harford County, Maryland. Although the garden is only approximately 40 years old, it is a remarkable assemblage of plant materials, landscape design attitudes and topiary designs. The garden has an overall linear plan which follows the Old Jarrettsville Pike in order that most of the estate could be left "open" and free for hunting purposes. The garden is open to the public from April through October on Weekends, with special arrangements available for weekday tours. The garden is maintained by the Ladew Topiary Garden Foundation.

Garden and topiary design was a hobby of Mr. Ladew's during most of his life; and although he is not a landscape architect, he did all of the basic design and preliminary installation work himself. Mr. Ladew designed both large scaled formal areas and more natural, intimate ones into his garden. Other than the topiary work, which is found in the more formal areas, the three most important design elements considered in planning the garden were vista, color and texture. The major garden axis provides an uninterrupted view of over 1100 feet across terraced topiary, the large central circular bowl, and through hemlock allees. Minor axes provide shorter vistas across iris beds, pools, streams and lawns.

The smaller, natural areas of the garden are designed around a variety of individual color and textural schemes. The berry garden is totally composed of berry producing plant material. The azalea garden is an unusual combination of azalea varieties planted under a grove of apple trees. A series of white, red and yellow gardens contain flowers and shrubs of appropriate color. The most recent addition to the garden is an iris garden composed of hundreds of iris varieties, topiary, pools and streams.

Most of the topiary is maintained over wire frames. Mr. Ladew's first exposure to topiary was to that of Lady Sophie Scott, in England, and for many years he had his frames made by Lady Scott's supplier, although he eventually began having his designs manufactured in this country.

The entire garden is punctuated with a variety of garden furniture, ponds and small buildings. Several French lead figures decorate the hemlock allees. The azalea garden surrounds a circular pond and fountain and the topiary Chinese junk sits in a naturalistic pool. The large central bowl has an oval pool at its center. Two small buildings serve as both focal points and shelters. A small Greek Temple sits at the end of the major garden axis and a tea house, that was once the ticket office of the old London Tivoli Theatre, is placed for seclusion and retreat.

The topiary designs are shaped from a mixture of both yew and hemlock. The designs include a foxhunt, swans, a Chinese junk, a giraffe, a Buddha, hedge windows, garland allees, geometrics (pyramids, spheres, cubes), Lyre birds and sea horses.
